ABOUT

I'm a Fullstack Web Developer. I'm experienced building website using PHP Native and CodeIgniter 3 since 2018. My project mostly for college student thesis project, thus, currently I have no experience working in company. I'm also a hard worker which prioritize finishing a task first before moving on to the next task, and loves to following new trend about technology and new things. Besides working, I love typing, puzzle games, problem solving (programming related), organizing, learning languages, and creating a meaningful diary.

EDUCATION

Palembang   **UIN Raden Fatah**   **2017 - Now**

- **Major**: Information System, S.Kom. (Current GPA: 3.78/4)
